

# Repair Services

We have separate sections in this catalog for Rebuilds and Electronic Repair (mostly on an exchange basis). Here's the breakdown of other items we can *reliably* repair. These are services that truly set GLIDE apart.

## TREADMILL ROLLERS

Heads or tails... you win! Why invest in a new roller when we can take care of your bent or broken shaft, and press out your tired old bearings and replace them with OEM or better parts with ease. Turning on a lathe allows us to clean off all the old wax build up and other gunk, restoring your roller to like-new condition. (Speaking of wax build up... why aren't you using our Premium Treadmill Wax so you don't have that problem)?

## AC GENERATORS (BRAKE ASSEMBLIES)

Round and round she goes... with magnets around wire wrapped around steel, it's usually the bearings that are the culprits making these units fail. After replacing the bearings, we'll put your unit on our test bench, assuring that the output is spot-on correct. By the way, after doing this repair, now would be a good time to replace your drive belt!

## GEAR REDUCERS

Here's an issue that, until now, you haven't been able to "step" around. Your only option has been to go back to the manufacturer and pay full boat for a new unit. Well, that's enough of that! GLIDE has sourced and/or manufactured the shafts, seals, gaskets, individual gears and bearings, allowing us to repair these crucial components. Hourly rates apply.

## WELDMENTS

If it ain't broke... no, scratch that. If it is broke, GLIDE can fix it! Whether it's the frame or the movement assembly, we not only repair the unit, but our welding reinforces the weakened area so that it won't break again. Better, stronger, faster... and it costs far less than Six Million dollars. Hourly rates apply.

## PLASTICS

Shrouds, motor covers, side panels... they all seem to break. Go figure, they're made out of plastic. Just because the factory wants an arm and a leg for replacement parts doesn't mean you have to put up with poor looking machines. In most cases, GLIDE can repair broken plastics and detail to the point you'd never know they were broken in the first place. Give us a call to discuss your situation.

**All Repairs Are 100% Guaranteed!**
